## **I. BOARD ADOPTION**

The Eastern Kern Air Pollution Control District (District) Governing Board adopted amendments to Rules 301 (Permit Fees), 302 (Permit Fee Schedules) and 303 (Miscellaneous Fees) at an open hearing on January 13, 2022. The meeting was held at the District Board Chambers located at 414 W. Tehachapi Boulevard Suite D Tehachapi, CA 93561 and beginning at the hour of 2 PM.

A Notice of Public Hearing was duly published 30 days prior to this hearing in adjudicated newspapers: the Mojave Desert News, the Daily Independent, Tehachapi News, and the Bakersfield Californian. The notice requested written comments on the proposed Rule amendments and associated staff report by January 12, 2022. No comments were received.

Amended Rules 301, 302, and 303 became effective and enforceable upon adoption.

## **II. INTRODUCTION**

Rules 301, Permit Fees, 302, Permit Fee Schedules, and 303, Miscellaneous Fees were last amended March 12, 2015.

On October 20, 2021, the District held a public rule development workshop at the District Board Chambers in Tehachapi to present proposed amendments to Rules 301, 302, and 303. A 30-day public review and comment period followed the workshop, which ended November 19, 2021. The District received no comments.

### **III. BACKGROUND**

To attain the state and federal air quality standards, the Federal and California Clean Air Acts require the Eastern Kern Air Pollution Control District (District) is required to permit stationary sources, develop attainment plans, adopt rules and regulations, implement programs to reduce emissions, and ensure that permitted stationary sources of air pollutants are in compliance with all applicable federal, state, and District rules. The revenue to fund the District's annual operating budget for these programs primarily comes from District Fees (Regulation III). The District has not implemented an across-the-board fee increase since 2008, however inflation and general operation costs continue to increase. The District has also seen an increase in new programs and responsibilities. Overall, District expenses have increase by 92% in the last 16 years. The increase in fees will offset costs associated with processing applications, day to day operations, execution of attainment related projects, and adjust for the past 13 years of inflation.

The District's primary responsibility is overseeing stationary sources in Eastern Kern County. The District's annual operating budget comes from various sources but is almost exclusively funded by fees imposed on these sources. A minor portion of District operational activities (1%) are funded by state subvention. Other state grant funds, such as the Carl Moyer Program, are pass-through funds for emission reduction projects within the District. The fees collected through a surcharge on motor vehicle registrations (DMV Fees) are also primarily used for pass-through vehicle related emission reduction projects.

The District receives a small percentage of the grant funds for administrative costs, which covers approximately 1.6% of the District's operating expenses. A portion of the DMV Fees are used for air monitoring services and equipment and for outside plan development assistance. The District also receives federal funds from the Environmental Protection Agency (EPA) to partially fund operation of two PM2.5 air monitoring instruments.

### **IV. DISCUSSION**

California Health & Safety Code 42311(a) provides air districts the authority to adopt fee schedules to cover the costs of permitting stationary sources of air pollution. Since 2008, the District has minimized the need for fee increases by adhering to fiscally-conservative principles cross training staff to preform multiple functions. In spite of complying with multiple new state and federal mandates, the District has not required an across-the-board fee increase since 2008. In fact, the District's fees have only increase by 15% across-the-board over the last 22 years. At the same time Consumer Price Index inflation has increase 42% from 2000-2017. Similarly, other air districts have adjusted their fees upwards multiple times over time period, resulting in a significant cumulative difference in fee increases amongst air Districts.

Comparison with Other Districts

(Historical permit fee increases, 2000-2017)

Bay Area	201.1%
South Coast	77.0%
Sacramento	57.8%
San Joaquin Valley	27.6%
Eastern Kern	15%

**Examples of New State and Federal Mandates and Additional Workload •**

- New ozone and PM attainment plans in the next two years
- Develop major rules for contingency
- Residential Wood Burning Permit Portal
- Increased work associated with new state emission inventory regulations including Emission Inventory Criteria and Guidelines (EICG) and Criteria and Toxics Regulation (CTR) pursuant to AB 617.

**V. DESCRIPTION OF RULES**

**Rule 301**

Requires every applicant for an ATC, PTO, Request for Exemption, or Agricultural Engine Registration to pay a nonrefundable filing fee of \$120. If an application is filed for a PTO by reason of transfer of ownership or a change in the company's name and no alteration, addition, or transfer of location has been made, the applicant shall pay a \$65 filing fee.

**Rule 302**

Requires a first year fee according to the equipment type and size to be paid before issuance of ATC. These fees will also be billed every year for PTO renewal once construction is complete. In determining fees to be charged, applicable equipment within each process requiring a permit shall be totaled for each schedule. In the event that more than one fee schedule is applicable to a PTO, the governing schedule shall be that resulting in the higher fee.

**Rule 303**

Requires an application processing fee for engineering analysis based on the number of hours spent completing each project. Emissions testing, CEQA document preparation, portable equipment inspections and preliminary consultation may require additional fees, which will be determined by the Control Officer. Priority processing is also available and has a separate overtime hourly processing rate.

**VI. PROPOSED RULE AMENDMENTS**

**Rule 301**

The current Rule requires a filing fee \$120 for regular applications and \$65 for transfer of ownership application. District is proposing an overall fee increase of 10%. This equates to a \$130 filing fee and a transfer of ownership fee of \$70.

Currently, fees pursuant to Rule 301 apply to all Authority to Construct, Permit to Operate, Request for Exemption, and Agricultural Engine Registration. District is proposing to add language clarifying applicability for Title V Permits pursuant to Rule 201.1. Section I, Filing Fee of Rule 301 has been revised to read as follows: Every applicant for an Authority to Construct, Permit to Operate, Title V Permit to Operate pursuant to Rule 201.1, Authority to Construct Renewal, Request for Exemption, or Agricultural Engine Registration shall pay a nonrefundable filing fee of \$130. Filing fee increased from \$120 to \$130 and transfer of ownership fee increased from 65 to \$70. Additionally, under Section III, reference to Rule 202 Section II.K.5-7 will be corrected to read “Section II.M”. Reference to Section II.K.5-7 is no longer valid since Rule 202 has been amended.

### **Rule 302**

As mention before, fee schedules pursuant to Rule 302 have not increased since 2008. Rule 302 was modified in 2015 to incorporate Schedule 7, Stationary Agricultural Engine Registration fee schedule and a Commercial Solar Power Generation Schedule as Schedule 12. District is proposing a fee increase of 10% across-the-board. The proposal includes increasing fees listed in Rule 302 by 5% starting in fiscal year 2022/2023 and an additional 5% starting in fiscal year 2023/2024. Amended rule with fee changes is listed in appendix B.

### **Rule 303**

For amended Rule 303, the District is proposing an hourly engineering analysis fee increase from \$100 to \$110 per hour. This change will be implemented to cover the costs associated with processing and engineering analysis. Similar to Rule 302, the District is also proposing a phased fee increase, 5% starting in fiscal year 2022/23 and an additional 5% starting in fiscal year 2023/24.

## **VII. EXEMPTIONS**

If equipment is required to have an ATC/PTO, then it is subject to Rule 301, 302, or 303 and therefore not exempt from these Rules.

## **VIII. RULE CONSISTENCY ANALYSIS**

Pursuant to Section 40727.2 of the California Health and Safety Code (CH&SC), prior to adopting, amending, or repealing a rule or regulation, the District is required to perform a written analysis that identifies and compares the air pollution control elements of amended rules with the corresponding elements of existing or proposed District and EPA rules, regulations, and guidelines that apply to the same source category. Applicability of the amended rules was the element analyzed. All facilities will be subject to Amended Rules 301, 302 and 303.

## **IX. ECONOMIC IMPACTS**

### **Rule 301**

Pursuant to State law, the District is required to analyze the cost effectiveness of any proposed rule amendment that implements Best Available Retrofit Control Technology (BARCT). The draft amendments do not add BARCT requirements and therefore are not subject to the cost effectiveness analysis mandate. Additionally, state law requires the District to analyze the socioeconomic impacts of any proposed rule amendment that significantly affects air quality or strengthens an emission limitation. The draft amendments will have neither effect, and are therefore not subject to the socioeconomic analysis mandate. Amended Rule 301 pose no significant cost to industry.

### **Rule 302**

The increase in staff workload pursuant to attainment plan and rule development along with additional resources required for implementing the District's air toxic program (AB2588) and new additional requirements for maintaining emission inventories pursuant to AB617. Each year the District receives approximately \$1,360,000 from Permit to Operate Fees pursuant to Rule 302, which covers approximately 30% of the department's annual expenses. The 10% increase in permit fees across the board is expected to recoup an additional \$130,000 which will be used to offset impending operating costs to the District.

### **Rule 303**

Hourly engineering analysis fee will increase \$10 an hour, which is a 10% increase spread over 6 years. Each year the District receives approximately \$41,000 from engineering analysis fees, which only covers 1% of the department's annual expenses. The increase will offset engineering time and increasing operating costs of the District.

## **X. SOCIOECONOMIC IMPACTS**

CHSC Section 40728.5 exempts districts with a population of less than 500,000 persons from the requirement to assess the socioeconomic impacts of proposed rules. Eastern Kern County population is below 500,000 persons.

## **XI. ENVIRONMENTAL IMPACTS**

Both the California Environmental Quality Act (CEQA) and ARB policy require an evaluation of the potential adverse environmental impacts of proposed projects. The intent of Rules 301, 302 and 303 is to outline fee requirements of the District. An additional consideration is the impact that each rule may have on the environment. The District has determined that no significant adverse environmental impacts should occur as a result of adopting amendments to Rules 301, 302 and 303. Pursuant to the Section 15061, Subsections (2) & (3) of the CEQA Guidelines, staff has prepared and filed a Notice of Exemption for this project.
