

**RULE 108.2 Emissions Statement Requirements** - Adopted 7/13/92, Amended 5/2/96, 8/4/22

**I. Applicability**

Requirements of this Rule shall apply to any person owning or operating any source operation with the potential to emit Oxides of Nitrogen (NO<sub>x</sub>) or Volatile Organic Compounds (VOCs).

**II. Requirements**

An owner or operator of any source operation emitting, or with the potential to emit NO<sub>x</sub> or VOCs shall provide the District with a written statement, in such form as prescribed, showing actual emissions of NO<sub>x</sub> and VOCs from such source. At a minimum the emission statement shall contain all information contained in the California Air Resources Board (CARB) Emission Inventory Turn Around Document as described in Instructions for the Emission Data System Review and Update Report. The emission statement shall contain emissions for the time period specified by the Control Officer. The emission statement shall also contain a certification signed and dated by a company's responsible official that the information contained within is accurate to the best knowledge of the individual certifying the emission statement. The first emission statement shall cover 1992 emissions and shall be submitted to the District by June 1993. An emission statement for prior calendar year emissions shall be submitted annually thereafter.

**III. Exemption**

The Control Officer may waive this requirement to any class or category of stationary sources emitting less than 25 tons per year (tpy) of NO<sub>x</sub> or VOCs if the District provides CARB with an emission inventory of sources emitting greater than 10 tpy of NO<sub>x</sub> or VOCs based on the use of emission factors acceptable to CARB and the EPA.
